

- ✓ The only portable endogenous bioresonance device in the world!
- ✓ Pathological oscillations are eliminated via therapy with inversion
- ✓ Restores the normality in the mesenchyme (extracellular matrix, intracellular matrix, endonuclear matrix)
- ✓ Increases energy, balances the body and strengthens immune defenses
- ✓ Reduces inflammation
- ✓ Affects pathogenic microorganisms
- ✓ Is an excellent symptomatic treatment in the acute phase of illness
- ✓ Calms the mind and body and reduces stress

For optimal prevention of illness, use the BRT twice weekly, combined with DeLixir smart-cell nutrition!

CLEANSING AND DETOXICATION

VERSATILITY
A device for healing the whole body

EFFICACY
Effective technology used by leading scientific organisations

SIMPLICITY
Easy to use

SAFETY
Safe to use with minimal contraindications

PORTABILITY
Conveniently and easily portable

EFFECTIVITY
Effectively maintains health, beauty and youth

DEVITA BRT

WHAT ARE THE EFFECTS?

The most effective method for addressing food intolerance, intoxication, inflammation, metabolic disorders and metabolic charges.

Improving the healing processes of the entire body through biologically active points located on the skin of the palms and soles of the feet.

Promotes the recovery of the body by eliminating the disharmonious (pathological) vibrations and enhancing the harmonic (physiological) vibrations.

Increases the defense system and resistance to negative environmental influences, maintaining the physiological homeostasis of the body.

With the BRT device, we erase the negative information from the organism, as simply as erasing a file! By reversing disharmonious frequencies, the communication of pathogenic microorganisms is disrupted, with the result that the organism can more advantageously deal with them.

DeVita-technologies are the fastest, easiest, most reliable and modern way to improve your health.

1. In and around the human body there are electromagnetic oscillations. These electromagnetic oscillations are superordinate to and control the body's biochemical processes.
2. As well as the physiological electromagnetic oscillations, there are also pathological, interfering oscillations in every person, caused by toxic loads, injuries, infections, incompletely cured diseases, or from harm caused by interventions or other treatments....
3. The physiological and pathological oscillations together are referred to as the patient's own oscillations.
4. The patient's own oscillations can be 'collected' from the surface of the body (antenna effect) and conducted through a lead into a therapy device.
5. Therapeutic oscillations are made from the patient's own oscillations, with the aid of modern electronics, without adding technically generated, or any other frequencies.
6. The patient's own oscillations, transformed into therapy oscillations, are fed back from the Devita BRT device to the patient's body, where therapeutic effects takes place.
7. The therapeutic oscillations cause a beneficial effect in the patient's body, firstly by suppressing or reducing the pathological oscillations and secondly by boosting and strengthening the physiological oscillations.
8. The aim of bioresonance therapy is to reduce or eliminate the pathological 'disharmonious' oscillations and simultaneously strengthen the physiological 'harmonious' oscillations.
9. Improvements at the biophysical, energetic level are followed, in time, by an improvement in the biochemical processes involved in normalising functioning and promoting healing.

The effectivity of the BRT can be enhanced by also using the DeVita 'Energy 11' programs to eliminate geo-pathogenic or bio-pathogenic interference and to reduce intense emotional stress.

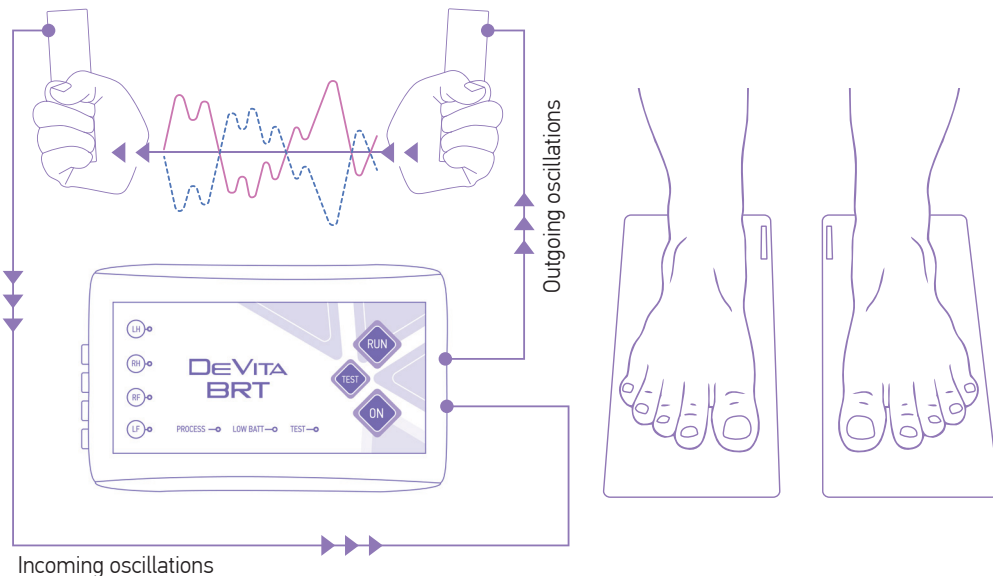

The effectivity of the BRT can be enhanced by the following programs in the DeVita RITM Mini: Active Protection, Blood circulation regulation, Digestion, Anti-stress, Detoxification... to improve the body's defense, alleviate circulatory disturbances, address digestive problems or poisoning, to reduce stress and enhance the body's energy levels.

ILLUSTRATION OF ACTION

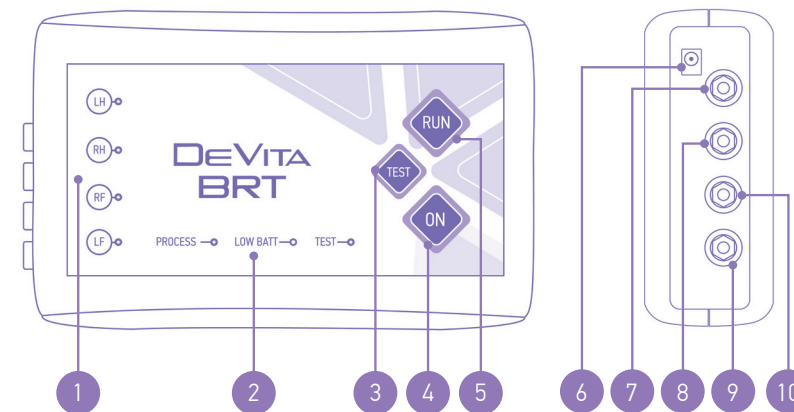

The device is based on the developments of F. Morell and E. Rush who, in Germany in 1977, proposed a new biophysical method for BRT (Bioresonance Therapy). For the first time the experience of both a doctor and an engineer were combined to develop this method of treatment. BRT is a method of endogenous bioresonance correction using the ultra-thin electromagnetic signals already within one's own body. This is an invaluable method of correction, contributing to the restoration of the body's defenses and adaptation reserves, by enhancing an individual's harmonic (physiological) and weakening their disharmonious (pathological) electromagnetic oscillations.

EXPLANATION OF KEY FEATURES FOR OPERATION:

1. LED indications of connected leads.
2. Status indication ('PROCESS' - the session being performed, 'LOW BATT' - low battery and 'TEST' - Test mode).
3. 'TEST' - button for switching on the 'Test' mode.
4. 'ON' - the power button for turning ON/OFF the device.
5. 'RUN' - button for starting session.
6. Connector for connecting a power adapter.
7. Socket (LH) for connecting the Left-Hand cylindrical electrode.
8. Socket (RH) for connecting the Right-Hand cylindrical electrode.
9. Socket (LF) for connecting the Left-Foot plate electrode.
10. Socket (RF) for connecting the Right-Foot plate electrode.
