

The **EAVPro software** is designed to enhance the user experience of the **DeVita Professional** and **DeVita-D** devices.

The application supports the following functionalities:

- Client database
- Appointment scheduling
- VRT evaluation results
- History of preparations and recommendations
- Detailed evaluation results report

Minimum System Requirements:

- Processor: 1 GHz
- RAM: 1 GB
- USB input

The DeVita Professional represents a cutting-edge integration of the capabilities, functions, and benefits of the DeVita Combi and DeVita D devices, while also offering the restorative treatments of the BRT.

BOTH DEVITA PROFESSIONAL AND DEVITA D ALLOW YOU TO:

- Perform a comprehensive health and wellness assessment
- Detect the presence of various types of allergens, toxins, and pathogenic micro-organisms
- Conduct a detailed assessment of the condition of specific organs and body systems
- Identify nutrient and vitamin deficiencies in the body. Determine the appropriate recommendations or methods for maintaining health
- Select suitable homeopathic preparations and evaluate their compatibility in cases of complex treatment plans
- Create and maintain a client database
- Choose between manual or automatic device operation
- Record customized / personalized preparations
- Provide clients with recommendations in digital or printed form to improve their health using Deta Elis products

DeVita technologies are the fastest, easiest, most reliable and modern way of improving your health!

A HOLISTIC DEVICE FOR IN-DEPTH HEALTH ASSESSMENT AND MULTIPLE THERAPIES!

The flagship of our technology, designed for healthcare professionals and certified therapists. The **Devita Professional** is Deta Elis' latest achievement: a holistic device offering multiple methods of health assessment and evaluation. With the Devita Professional, a specially trained healthcare professional can not only conduct a comprehensive assessment of their client's health and wellness status, but also provide five types of restorative treatment

Endogenous bioresonance therapy

Exogenous bioresonance therapy

Electrotherapy

Quantum therapy

Combination therapy

THE "BRT" MODULE

This module operates within the range of the body's own, natural electromagnetic vibrations. It is designed to restore the body's defense mechanisms and address pathological processes by eliminating disharmonious oscillations. Its principle of restoration is based on the methods of F. Morrell.

Additionally, this module (when used in combination with the "Selector" module) is designed to imprint the properties of preparations (e.g., homeopathic, nosodes, organ preparations...) onto a variety of carriers (water, alcohol, homeopathic pillules...) with the possibility of also preparing autosodes.

"MEASUREMENTS" MODULE

This module is used to measure the electrical parameters of biologically active points (BAP) in accordance with R. Voll's method, and measurements according to the vegetative reflex test (VRT) method.

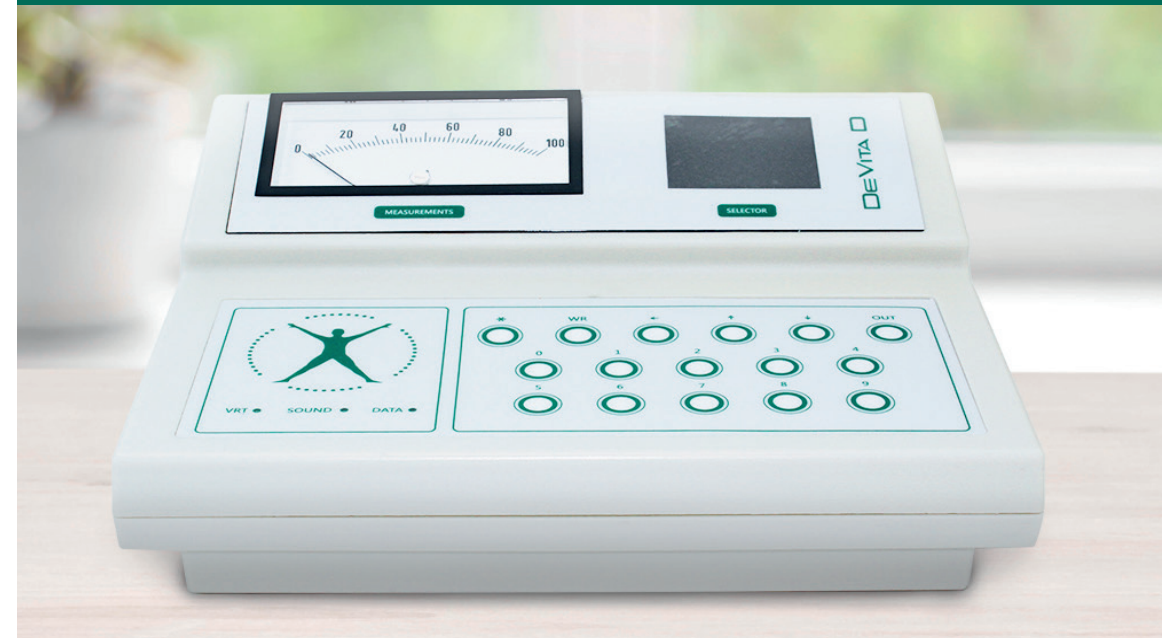

"SELECTOR" MODULE

This module is an "electronic container of preparations" and is used to test the effect of preparations on the human body (in conjunction with the "Measurements" module). This module can also be used alongside the "BRT" module, for imprinting the properties of preparations (homeopathic, nosodes, organ preparations...) onto various carriers (water, alcohol, homeopathic pillules...) with the possibility of also preparing autosodes.

"TREATMENT" MODULE

This module is used to relieve the stress burden caused by microbial loads in the human body: viruses, bacteria, fungi, protozoa, helminths... as well as to protect against stress factors, maintain homeostasis, improve performance, and help prevent premature aging.

DEVITA - D

THE "TREATMENT" MODULE HAS FOUR FIELDS OF ACTION:

1. BIOCORRECTIVE EFFECT – DEVITA AP

This function is performed using the DeVita AP device. It is based on the research of R. Rife and his successors. Scientists have demonstrated that every living organism possesses its own electromagnetic signature. Waves of specific frequencies, matching the resonant frequencies of pathogenic microorganisms, are generated by the device and transmitted into the body. These frequencies can alter the permeability of the microorganisms' membranes, thus leading to their destruction. The external AP antenna emits frequencies targeting specific types of viruses, bacteria, helminths, protozoa, and fungi... resulting in a deep detoxification of the body.

3. QUANT

This device's action on the body is based on research in the field of quantum light theory, which includes red light therapy. Visible light has a broad spectral color composition, consisting of radiation with various wavelengths and frequencies. Each color can have a specific effect on certain organs or body-systems via the skin's sensory receptors.

2. REGULATORY EFFECT – DEVITA RITM

This function is performed using the DeVita RITM device. It is based on long-term research by scientists such as R. Voll, H. Schimmel, A.F. Kramer and Paul Schmidt among others. According to their findings, each healthy organ has its own specific resonant frequency, which differs from that of a weakened, diseased or degenerated organ.

Low-intensity bioresonance frequencies mimic the frequencies of healthy organs. The application of these frequencies helps to "re-tune" the body to a spectrum of healthy frequencies, resulting in increased adaptive reserves and the restoration of self-regulatory processes.

4. HV ELECTROTHERAPY & ELECTROACUPUNCTURE

This function of the device is based on the use of electrical impulses, with selectable HV STEP and HV RAMPING electrotherapy modes, which help eliminate various pathological conditions.

These operating modes are integrated into the device.

HEALTH & WELLNESS ASSESSMENT DEVICE WITH SOFTWARE

The DeVita D is a reliable, high-precision device with EAVPro software for health and wellness assessments. It combines both an "Measurement" unit and a "Selector" unit within a single housing.

The EAVPro software, makes the DeVita D user-friendly for health professionals and other users. The "Measurement" unit is fully integrated with the VRT method and the R. Voll method.

The "Selector" unit contains over 18,000 homeopathic preparations and is equipped with an active reprinter for imprinting homeopathic remedies onto carriers (water, alcohol, homeopathic pillules...) – both in direct and inverse form – according to the method of H. Schimmel.

THE BENEFITS OF DEVITA-D MEASURING:

HIGH PRECISION

SAFETY

VERSATILITY

EFFECTIVENESS

INFORMATIVE
